DETAILED ACTION

1. The Declaration filed on 1/4/05 under 37 CFR 1.131 has been considered but is ineffective to overcome the Donovan (2002/0010492) reference.

The Donovan et al. reference (2002/0010492 now U.S. Pat. No. 6,810,286 B2) is a U.S. patent or U.S. patent application publication of a pending or patented application that claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2306. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. If the reference and this application are commonly owned, the reference may be disqualified as prior art by an affidavit or declaration under 37 CFR 1.130. See MPEP § 718.

2. Please note that Donovan et al. (2002/0010492) has been issued as U.S. Pat. No. 6,810,286 B2.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Donovan et al. (2002/0010492).

Application/Control Number: 09/858,036

Art Unit: 3762

Regarding claims 1, 6, and 11, Donovan et al. shows a method of increasing VEGF in a muscle cell and angiogenesis in a muscle tissue comprising the step of applying electrical voltage to the muscle cell or one or more areas of the muscle tissue, wherein the electrical voltage does not induce contraction of the muscle cells and wherein VEGF is increased and angiogenesis is induced after application of the electrical voltage ([0004], [0028], [0039], [0049], [0054-0055], [0083-0084].

Referring specifically to claim 6, although Donovan et al. does not specifically point out the increase of VEGF mRNA but points out an increase VEGF expression (claims 32, 49, 52) the Hang et al. article VEGF gene expression is upregulated in electrically stimulated rat skeletal muscle used the terms VEGF expression and VEGF mRNA interchangeably.

With respect to claims 2, 7, and 12, Donovan et al. shows the voltage is 0.1V at 50Hz [0054-0055].

Regarding claims 3-5, 8-10, and 13-15, Donovan et al. shows the muscle or muscle cells are smooth, skeletal or cardiac [0079].

Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Donovan et al. (6,810,286).
- 6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 09/858,036

Art Unit: 3762

Page 4

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kristen Mullen whose telephone number is (571) 272-4944. The examiner can normally be reached on M-F, 10:30 am-6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on (571) 272-4955. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
